An Ol' Irish Blessing

*May the road rise up
to meet you.
May the wind always
be at your back.
May the sun shine
warm upon your face,
and rains fall soft
upon your fields.*

Leadership in Hospice Palliative Care

Hospice palliative care is an interdisciplinary approach to care for patients and their caregivers. At the core of this team-based care is relationship building. Relationship building is also at the core of leadership. Nurses are in a unique position to become leaders within the hospice palliative care team and create change for their patients and their caregivers.

“Palliative leadership includes leadership in palliative care clinical practice to promote excellence and evidence-based practice; leadership in research to grow and mature the evidence; leadership in policy and advocacy to guide changes in health care, delivery, and access; and leadership in education to assure palliative care skill development for all health-care professionals as they enter into practice. Leadership in palliative care spans across disciplines, roles, and titles.” (Dahlin, C., Coyne, P., Goldberg, J., & Vaughan, L. 2019. Palliative Care Leadership. Journal of Palliative Care, 34(1):21-28. doi:10.1177/0825859718791427)

Supportive Counselling Services

Following a life-limiting or terminal diagnosis, some find it helpful to speak with someone about the many emotions, thoughts, fears and transitions that come along with illness. Individual counselling offers a safe space to explore difficult topics and learn how to manage life changes. This service is for individuals living with a life-limiting illness and their caregivers.

Supportive Counselling is provided by one of our Social Workers, who are registered healthcare professionals. This support may take place in your home, wherever "home" is, or at our office in a private space. Individuals are eligible for up to 12, one-hour sessions with our Social Workers. Further support is available for those who have been given a prognosis of less than one year.
